HIGH RISK CONTAMINANTS UNDER CONTROL

- Toxic or explosive active substances
- Corrosive, radioactive, flammable, combustive products.
- Bacteria, viruses, spores, prions.
- Heavy metals, asbestos, etc.

OUR SOLUTIONS
DECONTAMINATION OF YOUR ULTRA-CLEAN FACILITIES

CONTAMINATION DIAGNOSTIC
- Evaluation of the contamination of your facilities (production unit, equipment, clean rooms, research laboratories, etc.), ducts and air processing units
- Decontamination validation protocol (selection of molecules to track, definition of sampling procedures, analytical methods, localisation of sampling points, thresholds)
- Design of appropriate decontamination methods
- Inspection or surveillance plan

DECONTAMINATION WORK
A team of operational experts assigned to deal with your contamination issues goes into action to perform and manage the decontamination work. You will receive a final report and contamination control certificate upon completion of the work.

PREVENTION
- Periodic decontamination activities
- Execution of periodic checks
OWNER SUPPORT SERVICES/PROJECT SUPERVISION

As project manager or owner’s engineer for the work to decontaminate or dismantle your production facilities, R&D laboratories, clean rooms, etc. CURIUM draws up your specifications taking account of co-activities, administrative constraints and the projects for future use of the site.

helps you select works contractors and draw up contracts.

in the works phase, supports you in the field up until acceptance without reservations.

MANAGEMENT OF YOUR CHEMICAL, RADIOLOGICAL AND INFECTIOUS WASTE

› Technical study/Design of processing solutions.
› Inventory and characterisation.
› Repackaging of hazardous waste and preparation for transportation in compliance with applicable ADR, IMDG regulations.
› Identification of the most appropriate recovery and/or disposal solutions.

OUR PROMISES

- SINGLE INTERLOCUTOR
- RAPIDITY
  24/24 emergency response
  Optimisation of your projects
- QUALITY GUARANTEE
  Daily tracking of works progress
  Validation of decontamination
  Works completion report
- SAFETY
  Strong safety/radiation protection culture
  Obligatory training on risks and equipment control
  Internal training programmes
- ENVIRONMENT
  Fully familiar with ADR, IMDG regulations, Basel Convention
